PROFESSIONAL EXPERIENCE

Data Engineer, Cognizant India

Jun 2022 â Jun 2024

- â Performed data modeling to structure and optimize over 5 million customer and supplier records, enhancing accessibility, consistency, and integration within the client's data warehouse
- â Developed an ETL pipeline for ingesting and processing large-scale customer and supplier files, with PySpark and SQL to manage critical records that boosted accuracy by 98%
- â Implemented business rule-based transformations for Foundational Data Products using PySpark, driving a 60% increase in accessibility and improving integrity of the records
- â Streamlined the transformation of data by optimizing PySpark workflows and utilizing parquet, JSON file formats, reducing handling time by 30% and improving visibility
- â Automated ETL processes to extract, transform, and load supplier and customer information using Control-M, reducing pipeline execution times by 35%
- â Enhanced validation for transformed datasets in HDFS using SQL, reducing validation time by 50%
- â Optimized Procure-to-Pay (P2P) processes in a business spend management platform, reducing procurement cycle time by 20 days (a 65% improvement)

Database Intern, Cognizant India

Feb 2022 â May 2022

- â Developed SQL and Python scripts for data validation and analysis, ensuring 99.9% accuracy
- â Optimized complex SQL queries and executed efficient CRUD operations

EDUCATION

The University of Texas at Dallas

Aug 2024 - May 2026

- â Master of Science, Business Analytics and Artificial Intelligence

Vishwakarma Institute of Information Technology (VIIT), Pune

- â Bachelor of Technology, Mechanical Engineering

TECHNICAL SKILLS

Programming: Python, R, SQL, C, C++

Data Engineering and Data Science: Hadoop, Spark, ETL, NumPy, Pandas, PyTorch, Data Visualization, Terraform

Tools and Platforms: Databricks, Amazon Web Services (AWS), Microsoft Azure, PySpark, MS Excel, Tableau, Git

PROJECTS

Truck Data Analysis

Aug 2024 â Dec 2024

- â Ingested truck, location, and incident data from multiple CSV files into Hadoop and queried structured tables in Snowflake to compute risk scores, flagging 53% of fleet drivers as high-risk
- â Developed Snowflake SQL logic to correlate mileage, fuel efficiency, and incidents

Noise Prediction in Urban Districts

Jan 2025 â May 2025

- â Built and evaluated ML models (LightGBM, SVM, RF) to predict noise levels from urban sound data
- â Delivered insights for urban noise hotspots based on location, time, and sound type

LEADERSHIP

President, Training and Placement Cell | VIIT

Aug 2021 â May 2022

- â Led 10+ "Meet Us" sessions, mentoring 200 students to enhance their application process
- â Coordinated with 15+ companies to organize recruitment drives, resulting in a 30% increase

Team Leader, Entrepreneurship Development Cell | VIIT
